

QUAD AXLE WAGON

MODEL: R12-2500

STANDARD FEATURES

- The Canuck Quadaxle Wagon has an excellent tare weight allowing you to haul a greater payload
- Main frame rails manufactured from high tensile 100,000 psi steel
- Engineered flared end I beam main frame crossmember provides maximum rigidity for improved stability when dumping
- The gooseneck style main frame combined with R12 box lowers the center of gravity greatly improving the trailer's stability when dumping
- Our unique unibody turntable main frame is fabricated from high tensile 100,000 psi steel for maximum strength with minimum weight.
- Canuck uses a Holland H/D turntable on all their quadaxle wagon's to ensure optimal life expectancy.
- Formed channels mounted between suspension hangers for even greater frame stiffness against torsion twist.
- The center and rear box outriggers improve stability when unloading and minimize sidewall distortion.
- Rolled floor and side wall ring sections are fabricated with Hardox 450-205,000 psi.
- R-12 box design combined with the smooth, flat Hardox steel for better material clean out and extreme hardness in adverse conditions.
- Our drawbar design protects the trailer function lines from damage when dumping the truck box.
- Light weight aluminum light panel assembly for increased payload.
- Voltflex LED lights & integrated wiring harness.
- All Canucks trailers are finished with Endura polyurethane paint for long life coverage.
- The Canuck Quadaxle wagon has a standard 5 year warranty on the Main Frame Rails and a 3 year warranty on the Crossmembers and Box.
